I build websites, web applications, AI agents and automations for clients, from the first problem through testing and handover. My work includes new builds and careful repairs of systems a business already depends on.

SELECTED CLIENT PROJECTS

Client names link to their case studies on patrickgibbs.dev.

Mano Swartz Furs

AI AGENTS + OPERATIONS

Built seven connected systems for a fur-buying program: an AI-assisted text inbox, voice agents, offer follow-up, returns and alerts.

689 inquiry records across 491 callers; 20,054 customer photos delivered to the client's Drive.

Rebecca DeLawder · Getting Ohio Home

SEARCH + AI VISIBILITY

Wrote local area and relocation guides, corrected directory listings and fixed a blocked business profile for a Southern Ohio real estate agent.

Three weeks after the new pages went live, Google AI Mode recommended her first for "who is a good realtor to help me relocate to Southern Ohio for work" (signed out, 7 August 2026).

Harford DUI Education

WEBSITE + PAYMENTS

Built a six-page, owner-editable website with online payments and local search information. Fixed domain settings that blocked the owner's payment account.

Four recorded Lighthouse mobile checks scored 100/100; the owner gave a five-star review.

MySubletter

WEB APPLICATION

Adapted an existing Laravel script into a live subletting marketplace with reviews, paid listing boosts, messaging and account merging.

556 automated tests covered 619 application routes; the founder rehired me four times.

PUBLIC PRODUCTS

Epiphany Learn

Free lessons and quizzes that help business owners understand AI.

AI for Business Calculator

Estimate the time and cost involved in automating a workflow by changing the assumptions yourself.

> "He knew the ins and outs of all the code and could implement what I asked for without any trouble."
>
> Shannon Douglas, founder, MySubletter

SELECTED CLIENT PROJECTS, CONTINUED

Forging Teams

AI PRODUCT + SAAS

Turned the founder's leadership method into an AI coaching assistant, public demo and paid application with accounts and team access.

Subscription billing and seat controls delivered across four public tiers.

Jason Fransos at Delmar Mortgage

AI SEARCH + FOLLOW-UP

Built an AI assistant for mortgage-guideline questions and automated Jason's borrower text and email follow-up.

Guideline answers went from 20+ minutes to under one minute; Jason's contact ratio doubled. Both systems were in daily use for 12 months.

MORE DELIVERED WORK

SGNews · AI editorial automation

Built an RSS-to-AI-to-WordPress pipeline. Its public API recorded 47,277 published articles from 7 May to 12 September 2026.

Vettique · supplier-risk data

Connected seven data sources and removed 396,339 wrongly attributed shipments before release.

Music Exclusive · inherited-platform repair

Stabilized an inherited music subscription platform: resolved 15 security issues and checked 27 artist and fan steps in a four-day launch-readiness sprint.

Emergency Dentist LLC · AI phone reception

Built an AI voice agent that answers overnight calls and guides patients to booking: 63 hours of coverage each week.

HOW I WORK

> **Founder, Epiphany Dynamics · Dec 2025 to present.** I work directly with clients on discovery, build, testing and handover. I also maintain my own public learning and assessment tools.

AI + automation	AI assistants and agents, document search, voice, texting, publishing workflows, n8n and Make.
Web + apps	Astro, Next.js, React, Laravel, TypeScript, JavaScript, Python, PHP, Stripe, Supabase and Postgres.
Delivery	Payments, data integrations, access control, automated tests, launch checks and operating documentation.

PRESS

Quoted or featured in TechRound (twice), Tech Startup Network, VKTR, The B2B Clarity Edit, DestinationCRM, The Food Institute and Nashville Voyager between May 2026 and Aug 2026.
